

LO: To identify how
to stay safe on the
road.

Watch:

<https://vimeo.com/290440131>

1. BELT UP and stay quiet.

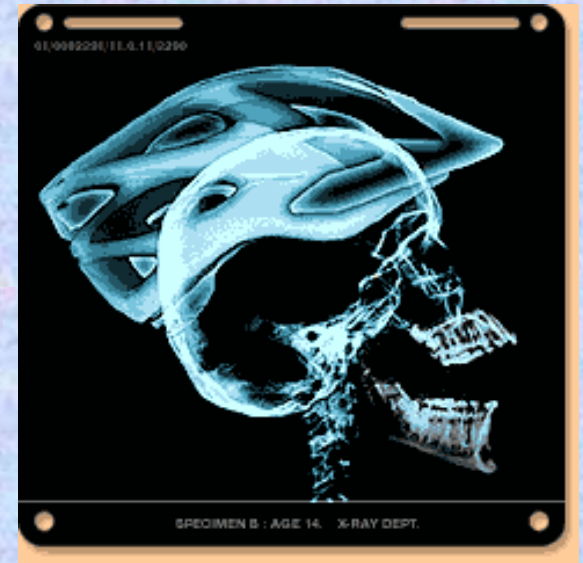

- ✓ Belt up before the car sets off – tell the driver to hold on
- ✓ Belt up for every journey – short and long
- ✓ Check everyone else belts up too – front and back, kids and adults!
- ✓ Never undo your seat belt on the journey
- ✓ The law says you have to use a booster seat if you're under 135cm tall – otherwise your seat belt can't do its job

2. GET THE GEAR!

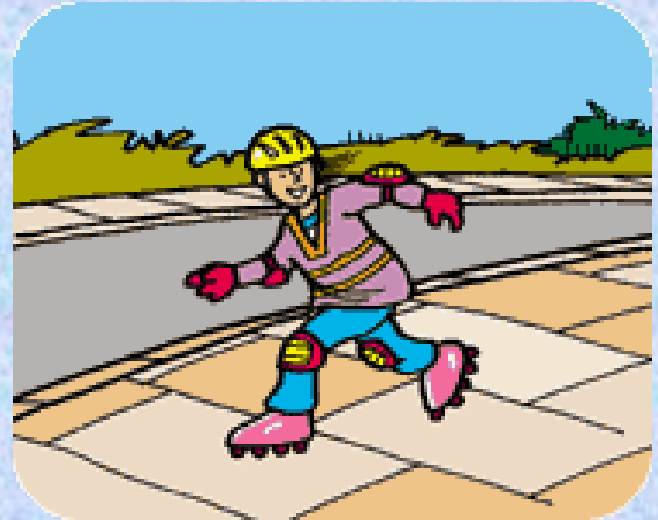

- ✓ Wear a helmet whenever you cycle
- ✓ If you have a bike, keep it in good shape
- ✓ Be bright, be seen – wear high-vis gear morning and night!

High vis-gear

FACT: at night a driver can usually see you from about **30 metres** away. If you wear high-vis gear they can see you from **160 metres** away (more than five times further!)

4. PLAY IT SAFE!

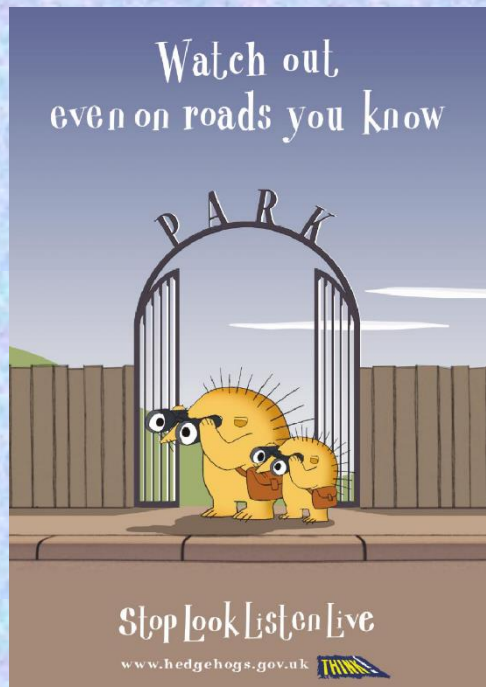

- ✓ Play in the park or a garden - never in the street
- ✓ Don't muck about near roads – keep your cool and stand up for safety!
- ✓ Keep well away from traffic on rollerblades or skateboards

5. CROSS SMART!

- ✓ Choose safe routes
- ✓ Use crossings if you can
- ✓ If there's no crossing, find somewhere safe – away from parked cars and bends in the road
- ✓ Stay focussed – never cross while using a mobile or stereo
- ✓ Don't trust traffic
- ✓ Use the Green Cross Code

THINK FIRST

STOP

USE YOUR EYES AND EARS

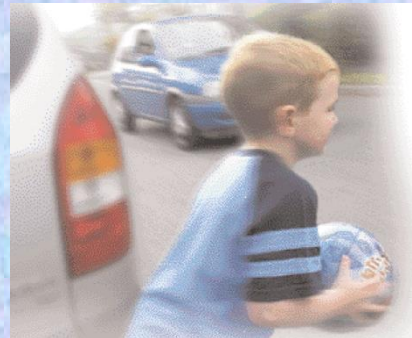

WAIT UNTIL IT'S SAFE TO CROSS

LOOK AND LISTEN

ARRIVE ALIVE

Danger zone

Can you spot what's safe and what's not?

Hazard spot

Can you spot what's a hazard
and what's there to keep you safe?

Your Task

Write what is unsafe in each picture.

Challenge: Suggest ways to improve road safety for each picture.
