LO: To express ideas about the natural world.

LO: To express ideas about the natural world.

What is the meaning of the word
nature?

What do you think of nature?

LO: To express ideas about the natural world.

1. What natural things are all around us?
2. Where did all these things come from?
3. What's so amazing about our world?

LO: To express ideas about the natural world.

Could you make the natural things we saw in the video?

Discuss with the children where they think these things come from and add the children's ideas to make a mind map of the children's responses.

Nature is amazing and the world would be very different without it.

What things are produced naturally?

Discuss that animals, landscapes, plants, vegetables, fruit and the weather all comes from nature.

What would you miss most if nature stopped doing its job?

What are you most thankful for?

LO: To express ideas about the natural world.

Task 1

In groups, you are going to make a 'nature' collage, deciding what aspects of nature you are most thankful for.

Challenge Task

Watch the life-cycle video with the children and discuss the changes that takes place in the natural world.

<https://www.youtube.com/watch?v=kVm5k99PnBk>

Ask the children to consider the things they think are most 'amazing' about our world.

Discuss the feeling of 'awe and wonder' some natural things cause us to feel.
