Complete this activity booklet. Here are some facts to remember

100ml = 1cl,

1000ml = 1l

1cl= 100ml

1l = 1000ml

10mm = 1cm

100cm= 1m

1000m = 1km

1000g =1kg

Perimeter is when you add up all the sides of a shape

What is a composite rectilinear shape? (click on this link to find out

Area is when you find the height and width of a shape and multiply them together. If it is a composite shape or a shape with more than 4 sides, you will have to split up the shape into two or three parts, work out the areas of those parts and then add up the areas (more info on this link https://www.bbc.co.uk/bitesize/topics/zjbg87h/articles/zwqt6fr)
