## Year 5 Maths Home Learning Workbook

## Measures

## Year 5 Programme of Study: Measures

| Statutory Requirements | Activity | Page | Notes |
| :--- | :--- | :---: | :--- |
| Convert between different units <br> of metric measurement. | Converting Between <br> Different Units of <br> Measurement | 2 |  |
| Understand and use <br> approximate equivalences <br> between metric units and <br> common imperial units, such <br> as pounds, inches and pints. | Metric vs. Imperial | 3 |  |
| Measure and calculate the <br> perimeter of composite <br> rectilinear shapes in <br> centimetres and metres. | Perimeter |  |  |
| Calculate and compare the <br> area of rectangles (including <br> squares), including using <br> standard units, square <br> centimetres and square metres, <br> and estimate the area of <br> irregular shapes. | Area | 4 |  |
| Estimate volume and capacity. | Volume and Capacity | 7 |  |
| Use all four operations to solve <br> problems involving measure <br> using decimal notation, <br> including scaling. | Problem Solving | 9 |  |
| Solve problems involving <br> converting between <br> units of time. | Converting Between <br> Units of Time | 8 |  |

## Converting Between Different Units of Measurement

1. Fill in the empty boxes in the table below. The first row has been done for you.

| Millilitres (ml) | Centilitres (cl) | Litres (l) |
| :--- | :--- | :--- |
| 1500 | 150 | 1.5 |
| 3000 | 300 | 3 |
| 2000 | 200 | $\mathbf{2}$ |
| 4300 | 430 | 4.3 |
| 700 | 70 | 0.7 |
| 400 | 40 | $\mathbf{0 . 4}$ |
| 60 | $\mathbf{6}$ | $\mathbf{0 . 0 6}$ |

2. Draw lines to match the equivalent measurements.

3. Fill in the missing measurements.
$400 \mathrm{~g}=0.4 \mathrm{~kg}$
$7000 \mathrm{~g}=7 \mathrm{~kg}$
$3500 \mathrm{~g}=3.5 \mathrm{~kg}$
$80 \mathrm{~g}=0.08 \mathrm{~kg}$
$5500 \mathrm{~g}=5.5 \mathrm{~kg}$
$90 \mathrm{~g}=0.09 \mathrm{~kg}$
$12300 \mathrm{~g}=12.3 \mathrm{~kg}$
4. Order these weights from lightest to heaviest.
2.3 kg
2000g
0.4 kg
4 kg
3400 g
$4003 g$
0.4 kg
2000g
2.3 kg
3400g
$4 k g$
4003g

## Metric vs. Imperial

5. Write the measurements on the rulers in centimetres.

## 2.5 centimetre $=1$ inch

## 25 cm

50cm

7.5 cm
6. Convert the measurements of each jug of liquid.

## 1 litre = 1.75 pints

2 litres

7 pints

17.5 pints
7. Convert the weights on each of the scales.
0.45 kilogram = 1 pound (lb)

28 grams = 1ounce (oz)

3 lb (pounds)

928 g

## Perimeter

8. Calculate the perimeter of this rectilinear shape.

|  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  | 7 cm |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  | 5 cm |  |  |
|  |  |  |  |  |  |  |  |

8 cm
9. Draw a composite, rectilinear shape which has a perimeter of 28 cm .

10. The perimeter of this composite rectilinear shape is 46 m . Calculate the value of sides $a, b$ and $c$.

$$
\begin{aligned}
& a=3 m \\
& b=4 m \\
& c=7 m
\end{aligned}
$$

## Area

11. Calculate the area of this shape.

$$
\text { Area }=55 \mathrm{~m}^{2}
$$

12. Calculate the area of this shape.

$$
\text { Area }=43 \mathrm{~m}^{2}
$$

13. Calculate the area of this shape.

$$
\text { Area }=65 \mathrm{~cm}^{2}
$$

14. A square has an area of $36 \mathrm{~cm}^{2}$. What is the length of one side?

## 6 cm

## Volume and Capacity

15. Draw lines to the most appropriate capacity for each of the following containers.

16. A jug holds 2 litres of squash. A cup holds 125 ml of liquid. If Thomas fills 4 cups with squash, how much will be left in the jug?

## 1.5 litres

17. A bath has a capacity of 80 litres. If $\frac{1}{4}$ of the bath is filled, how many millilitres of water will be in the bath?

20000 millilitres
18. Calculate the volume of this cuboid.

19. The volume of this cuboid is $80 \mathrm{~cm}^{3}$. What is the value of the missing side?

$$
a=4 \mathrm{~cm}
$$

## Converting Between Units of Time

20. Draw lines to match the 12 -hour and 24 -hour clock times.

21. Fill in the missing times. The first row has been done for you.

| Time in Words | 24-Hour Clock | 12-Hour Clock | Analogue |
| :---: | :---: | :---: | :---: |
| half past 5 in the evening | 17:30 | 5.30 p.m. | $\left(\begin{array}{lll} 10 & & 2 \\ 9 & & 3 \end{array}\right)$ |
| nine o'clock in the morning | 09:00 | 9.00 a.m. | $\left(\begin{array}{lll} 10 & & 2 \\ 9 & 0 & 3 \\ 8 & & 4 \end{array}\right)$ |
| quarter past three in the afternoon | 15:15 | 3.15 p.m. | $\left(\begin{array}{lll} 10 & & 2 \\ 9 & & 4 \\ 8 & & 4 \end{array}\right)$ |
| half past eight in the evening | 20:30 | 8.30 p.m. | $\left(\begin{array}{lll} 10 & 2 \\ 9 & 3 \end{array}\right)$ |
| quarter to eight in the morning | 07:45 | 7.45 a.m. |  |
| twenty past five in the morning | 05:20 | 5.20 a.m. |  |
| twenty to eleven in the morning | 10:40 | 10.40 a.m. | $0$ |
| midnight | 00:00 | 12.00 a.m. | $3$ |

## Problem Solving

22. Order the amounts from the least to most expensive.

23. This recipe makes enough brownies for 6 people.

100 g butter
200 g dark chocolate
250 g sugar
50g flour
60g cocoa
How much of each ingredient would you need to make enough brownies for 9 people?
150 g butter
$\mathbf{3 0 0 g}$ dark chocolate
$\mathbf{3 7 5 g}$ sugar
75g flour
90g cocoa
